Passengers on the Rev. Martin Ships

The following tables are based on on the Council Journal. The names are spelled as they were in the Council Journal, no attempt was made to correct or interpret misspellings. The location column is the modern day county that the land was probably located in, based on the description in the land surveys. Since the major distinguishing geographic feature in these land surveys was the river, stream or creek that the land was located on, in this table the modern county that that stream goes though is listed. This means that in many cases multiple counties are listed since the streams often cross through more than one county. In some cases no county is given, generally because the stream identified in the survey cannot be identified today, probably because the name has changed since 1772. These tables are derived from Stephenson¹
